

SEEKING BLESSINGS FROM THE DIVINE

On the eve of Gurpurab, eminent personalities from the political realm were present at the residence of deputy chief minister of Punjab, Sukhbir Singh Badal and his wife, Harsimrat Kaur Badal, union cabinet minister of food processing. They hosted a paath to celebrate Guru Nanak Jayanti. The theme of the occasion

was going green and saying no to fireworks. The venue was lit with floral decor. Among those who attended, included minister of finance & corporate affairs Arun Jaitley, minister of home affairs Rajnath Singh and minister of state, skill development & entrepreneurship Rajiv Pratap Rudy.

Bring home an air purifier to breathe easy

So, you have tried everything, from shutting windows to running exhaust fans. You have even gone on a green spree and brought home indoor plants, but the harmful pollutants have made permanent residence in your home. As the smog in the city refuses to clear up, Delhiites are now installing air purifiers in their homes. Why is it important to have these saviours in the comfort of your house? Well, it's because they help curb the level of pollutants such as smoke and dust, and also cleanse the air of pollen, dust and chemicals, helping you and your family to breathe easy. So, if you are planning to clean the air around you, try air purifiers by Daikin.

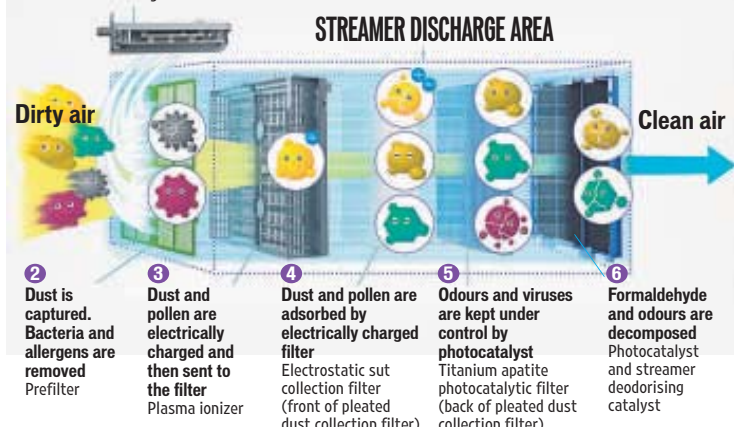

■ **Choosing the right fit:** An air purifier's effectiveness is dependent on factors such as number of people in the room, placement and pollution levels. Daikin goes beyond just purifying the air inside your home. Along with

purification, it decomposes harmful pollutants, dust, odours, bacteria, pet hair, moulds mites and other allergens. With a blend of streamer discharge technology and 6-stage filtration process, Daikin air purifier is aimed at producing a healthy home environment.

■ **Functionality matters:** Streamer discharge is a type of plasma discharge with decomposition strength equivalent to a heat of ~1,00,000 °C. It also covers a wide area for optimum purification as it generates high-speed electrons to purify the area. Owing to this, the technology is hailed among the best air-purification technologies in the world.

Daikin air purifier also claims to have a six-layer powerful decomposition and removal system which takes care of minuscule particles in the air. There is an option to turn on the turbo mode in the air purifier, which helps in quickly cleaning away

1 High-speed electrons are discharged that enable decomposition and removal

harmful particles. The brand's air purifier has a high air flow of 7m³/min which ensures faster suction of room air, and this in turn ensures faster air purification.

■ **Price-performance**

parameter: Daikin air purifier also claims that it can help in 99.9% virus and bacteria removal, and upto 99% mould spore removal. The air purifier helps in catching respirable

particulate matter 2.5 (PM2.5) and particulate matter 10 (PM10).

Priced at ₹24,500, you'd want to invest in the purifier that can prove to be one of the best buys this season. HTC

Are you ready to vroom?

One of the country's leading premium car manufacturer and the largest passenger car exporter, **Hyundai Motor India Ltd** (HMIL) recently launched its Global SUV **The All New Tucson - Born Dynamic**. This new model is a reflection of Hyundai's fluidic sculpture 2.0 design philosophy. The design expresses spirit and passion with a modern and a

confident touch, and gives it a distinctive look. Speaking at the launch, **YK Koo**, MD and CEO, Hyundai Motor India Ltd said, "The aspiration of owning a SUV is a global phenomenon. It represents a significant step and will herald a new chapter in HMIL's growth story. Sold over 4.5 million units globally in 12 years, the all new Tucson is a modern

and confident game changer SUV. The launch of 3rd generation Tucson will create a benchmark by giving world-class Hyundai experience to keen Indian customers." The front of the Tucson is dominated by the Hyundai signature hexagonal front grille, which connects with

the dual barrel LED headlamps to create a distinctive identity. The long bonnet accentuates the sleek profile while the 'Z' character - line above the rear wheel arches creates a sculptural side profile with a powerful stance.

The car is offered in 6-speed manual and automatic transmission, which delivers quick, efficient shifts and high fuel efficiency. The Manual Transmission (MT) comes with flex steer to allow drivers to switch among normal and sport modes for steering response depending on the road conditions and driver preference. The Automatic Transmission (AT) supports the new drive mode select feature to choose among normal, eco and sport modes for higher fuel efficiency and enthralling performance respectively.

The introductory Ex showroom price, New Delhi, for the petrol variant starts at ₹18,99,000 and goes upto ₹21,79,000 and the diesel variant starts at ₹21,59,000 and goes upto ₹24,99,000
