REGISTRATION PROCESS

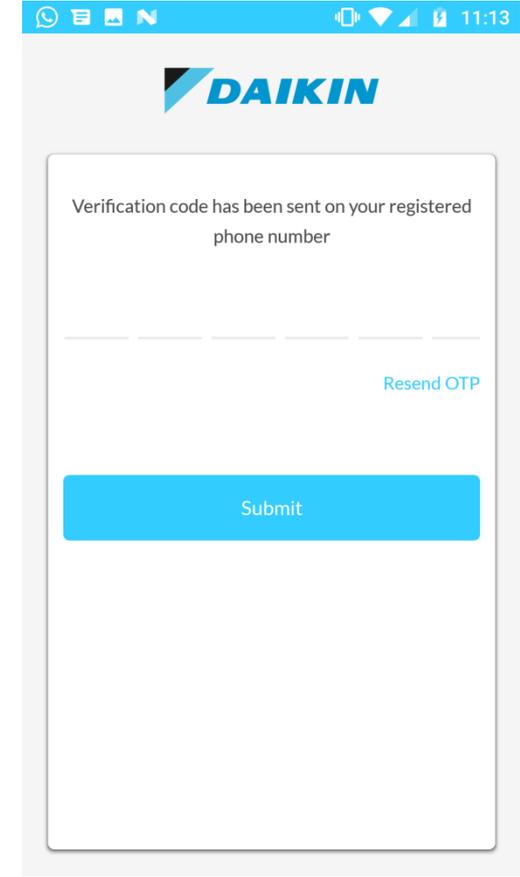

❑ After downloading the App user needs to register first and then user will be redirected to Login Screen.

The screenshot shows the DAIKIN app's login screen. At the top is the DAIKIN logo. Below it is a white box with the title 'LOG IN'. There are two input fields: one for a phone number with a '+91' country code selector and another for a password with a toggle for visibility. A 'Forgot Password?' link is positioned below the password field. A large blue 'Log In' button is centered at the bottom of the white box. At the very bottom of the screen, there is a link that says 'Don't have an account? Register'.

The screenshot shows the DAIKIN app's registration screen. At the top is the DAIKIN logo. Below it is a white box with the title 'REGISTER'. It contains several input fields: a phone number field with a '+91' country code selector, fields for 'First Name' and 'Last Name', an 'Email Id' field, a password field with a toggle for visibility, and a 'Re-Enter Password' field. At the bottom of the white box, there is a checkbox followed by the text 'I have read and agree to Terms and Conditions'. A blue bar is visible at the bottom of the white box, likely representing a submit button.

The screenshot shows the DAIKIN app's OTP verification screen. At the top is the DAIKIN logo. Below it is a white box with the text 'Verification code has been sent on your registered phone number'. There are three dashed lines representing input fields for the verification code. A blue 'Resend OTP' link is located to the right of the input fields. A large blue 'Submit' button is centered at the bottom of the white box.

- If user is opening App for the first time then user needs to Register first.
- To Register ,user has to click on **Register** Link.

Information Related to AC Wi-Fi and Remote Wi-Fi key functions.

Functions of of Wi-Fi key on the remote:

- 1. Reset (Wi-Fi Settings) :** Press Wi-Fi key for 10 seconds continuously keeping the remote towards the AC. After this , “Ad” will appear on the display with a beep sound.
- 2. Disable Wi-Fi:** To disable the Wi-Fi of the AC, press the Wi-Fi and Powerchill key together for 5 seconds. After this, “rd” will appear on the display with a beep sound.
- 3. Enable Wi-Fi:** On following the above mentioned procedure (Point 2), the Wi-Fi of the AC can be enabled again. After that , user will have to press the Wi-Fi key normally. On pressing it “dC” will appear on the display with a beep sound. Then based on the available networks, AC will automatically switch to the other preferred communication mode.
- 4. Normal Operation of Wi-Fi Key on the Remote:**

Pressing the Wi-Fi key on the Remote, keeping its direction towards the AC side , Current communication mode, in which the AC is operating, will be displayed on the AC display. Following are the three communication modes applicable to Wi-Fi feature supported AC :

 - ***DC : DIRECT COMMUNICATION***

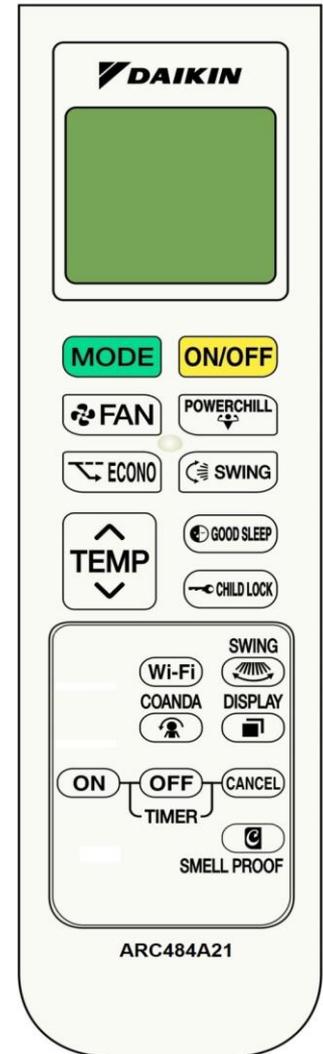

Direct communication is applicable When the AC is directly connected to Mobile App.
In this mode AC and Mobile app both communicate to each other directly.
Maximum 3 user can operate the AC using the same user id and password with which AC is linked.
 - ***LC : LOCAL COMMUNICAITON***

When the AC is connected to router (without internet) and Mobile is also connected with same router.
In this communication mode, Mobile App establish the communication with AC through the router.
All the data’s between them get transmitted and received through the router.
 - ***CC : CLOUD COMMUNICATION***

When the AC is connected to cloud using the router and Mobile App is connected to internet via data connection or router.

ERROR Condition :

If Wi-Fi key is pressed and there is no communication between Wi-Fi module and main controller, then “Er” message will be displayed , for 5 seconds on AC Display.

For more information about Wi-Fi related settings , updated operation and pamphlet manual, kindly download the comprehensive manual for Wi-Fi related functions/settings from link provided in the DAIKIN AC Manager App.
