FUSION COMMERCIAL
CONDENSING UNITS

THE PERFECT CHOICE WITH MORE THAN 100 YEARS OF REFRIGERATION EXPERIENCE AND IDEAL SOLUTION FOR COMMERCIAL REFRIGERATION.

Daikin Fusion Reciprocating and Fusion Scroll commercial refrigeration units create the perfect answer for those demanding a compact yet efficient unit. The units are the ideal solution for commercial refrigeration sectors where noise, size and reliability are paramount.

Housed in a cabinet made of electro-galvanised mild steel with an anti-corrosion treatment and coated in baked polyester powder paint, units are able to withstand the most stringent weather testing. The integral IP54 rated control panel provides further protection to all essential electrical components.

All units are acoustically lined. The Fusion Scroll units house the extremely efficient Copeland scroll compressor and the standard Fusion Reciprocating range house a highly reliable reciprocating compressor fitted with compressor jacket to further reduce noise. *excludes small units

All condensing units come complete with all components fitted during manufacture to save the installer time and money. Fusion Reciprocating and Fusion Scroll condensing units are available for both medium and low temperature applications.

FUSION SCROLL

On all models

- R404A refrigerant (Medium temperature units can also operate on R134a, if required.)
- Robust weather-resistant housing
- Highly reliable Copeland scroll compressor
- Liquid receiver with fusible plug
- Adjustable HP/LP pressure safety switch
- Liquid line with sight glass and filter drier factory fitted
- IP54 rated control panel
- Noise data tested to ISO 3774-2 standard
- Oil separator and check valve for low temperature models
- CE marked
- Polyurethane foam insulation for improved noise reduction
- Externally mounted service valves for easy isolation and an extended tail for easy installation
- Hexagon head screws and stainless steel washers for easy removal of access panels
- Isolator with integrated MCB for improved electrical layout
- Fan speed controller**
- Crankcase heater**

**optional

FUSION RECIPROCATING

On all models

- R404A refrigerant
- Robust weather-resistant housing
- Highly reliable hermetic compressor
- Liquid receiver with fusible plug
- Adjustable HP/LP pressure safety switch
- Liquid line with sight glass and filter drier factory fitted
- IP54 rated control panel
- Noise data tested to ISO 3774-2 standard
- Oil separator and check valve for low temperature models
- CE marked
- Polyurethane foam insulation for improved noise reduction
- Externally mounted service valves for easy isolation and an extended tail for easy installation
- Hexagon head screws and stainless steel washers for easy removal of access panels

On medium, large and twin fan models features include:

- Compressor contactor
- Fan speed controller**
- Crankcase heater**
- Fitted compressor jacket for improved noise reduction
- Isolator with integrated MCB for improved electrical layout
- Medium temperature units can also operate on R134a, if required

**optional

FUSION TANDEM DIGITAL SCROLL SERIES 5 COMMERCIAL CONDENSING UNITS

Fusion Tandem Digital Scroll unit is an extension to the range of Daikin commercial products. With a capacity up to 31kW, Series 5 is an ideal solution for larger convenience store applications and is a packaged alternative to multi compressor racks. Digital compressor capacity control matches varying display case loads and provides the perfect energy-efficient commercial refrigeration solution. It houses the extremely efficient Copeland Digital Scroll compressor and Copeland Scroll compressor which allow a simple and very reliable variable capacity system at MT envelope.

The digital modulated variable capacity Fusion Tandem Digital Scroll unit comes with Carel controller. The Carel controller provides real time load estimation and controls variable capacity from 10% to 100%. The controller also provides basic protection that includes high discharge temperature trip, compressor trip and oil return management. The controller can display suction temperature, outdoor temperature, condensing coil temperature and discharge temperature.

FUSION TANDEM DIGITAL SCROLL

On all models

- Twin Copeland Scroll compressors, 1 fixed speed and 1 digital
- Four condenser fans with control mode selection option
- Fan speed controller
- Microchannel condenser
- Electrical control panel with mains isolator
- Phase protection module
- Carel electronic controller with LCD display
- Mechanical back-up system
- Compressor HP switches
- External status lights
- Internal ball valves and external service valves
- Liquid line drier and sight glass
- Pressure relief valve on liquid receiver
- Hinged door access
- Operates with refrigerants R404A, R407A and R407F

FUSION DIGITAL SCROLL COMMERCIAL CONDENSING UNITS

Fusion Digital Scroll unit houses the extremely efficient Copeland Digital Scroll compressor which allows a simple and very reliable variable capacity system at MT envelope. The digital modulated variable capacity Fusion Digital Scroll unit comes with Carel controller. The Carel controller provides real time load estimation and controls variable capacity. The controller also provides basic protection that includes high discharge temperature trip, compressor trip.

The controller can display suction temperature, outdoor temperature, condensing coil temperature and discharge temperature. With a capacity up to 16kW, Digital scroll unit is an ideal solution for convenience stores, supermarkets and petrol forecourts. Digital scroll unit is also suitable for multi cabinet systems.

FUSION DIGITAL SCROLL

- Copeland Hermetic Digital Scroll Compressor
- Liquid receiver with fusible plug
- Oil separator and discharge non-return valve
- Acoustic lining
- IP54 rated control panel
- Isolator
- Manual Motor start with short-circuit and overload protection
- Advanced programmable controller
- LCD display
- High and Low pressure transducers
- Mechanical by-pass circuit
- Manually adjustable low pressure switch
- AC modulation fan speed controller
- Compressor contactor
- Step-down transformer 240V to 24V
- Fuse protection on controller, fan speed controller and backup system
- Crankcase Heater
- Operates with refrigerant R404A

AIR COOLING UNIT

Product Features

- Can be used with refrigerants R404A, R134a, R507A and R410A
- DX evaporator coil, with shredder valve soldered into suction line for ease of superheat measurement
- GI casing with pre-coated paint
- IP44 Axial fan with moisture proof protected and built in thermal overload
- Up to 3 heaters can be slotted for defrosting
- Pre-fixed wiring to fan motor
